DETAILED ACTION

Allowable Subject Matter

1. Claims 1 – 6 and 11 – 15 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claims 1 and 11, Wante (WO 99/578899) teaches sending a message from the primary station to the secondary station to inform the secondary station switch over time (Wante, Page 3, lines 4 - 12). However, Wante, Schmidt and Bridges either alone or in combination failed to teach the software reconfiguration message including indicia which is useable by the second station to estimate how long it will take to reconfigure itself, the second station receiving the message and using the indicia estimates its reconfiguration time, the second station sending a message giving an indication of the reconfiguration time to the first station, and the first station in response to determining the reconfiguration time, waiting until after the time has elapsed before using the reconfigured software in communication with the second station.

Regarding claim 14, Wante teaches sending a message from the primary station to the secondary station (inherently having a transceiver, a processor and memory) to inform the secondary station switch over time, (Wante, Page 13, lines 4 – 12). However, Wante, Schmidt and Bridges either alone or in combination failed to teach means, responsive to an external message for reconfiguring software in the store and means for estimating a reconfiguration

time in response to indicia in the external message and for causing the transceiver to transmit the estimated reconfiguration time.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
